MOTUL GREEN TECH™

With **MOTUL GREEN TECH**, the commitment is based on three fundamental pillars:

- Develop environmentally friendly products from **renewable** raw materials
- Provide performance to increase productivity and **reduce chemical consumption**
- Reduce **energy costs** related to the use of the products.

THE ADVANTAGES OF MOTUL GREEN TECH PRODUCTS

- COMPLIANCE WITH THE MOST STRINGENT REGULATIONS
- EXCELLENT LUBRICATING POWER ALLOWING LOWER CONSUMPTION.
- VERY HIGH FLASH POINT TO LIMIT THE RISK OF FIRE
- IMPROVED RESISTANCE TO OXIDATION
- LESS TOXICITY
- HIGH VISCOSITY INDEX FOR BETTER THERMAL STABILITY OF LUBRICANTS UNDER HIGH STRESS

TC64-DIGILOG touch probes –
Revolutionary touch probes for
maximum in-process reliability
during mass production

Hall No. 3A Stall No. B117

Advanced, scanning touch probes for milling and turning machines for automatic inspection of workpiece contours for machining errors. Exact measurement of workpiece position using digital measurement, extreme reduction in measuring time using cyberspeed, analogue scanning process.

KinematicsPerfect – Detecting and
optimising kinematic errors

KinematicsPerfect gives you a fully-developed software solution for measuring the kinematics of 4-axis and 5-axis machine tools. The NC-based measuring cycles enable precise checks, documentation and corrections of rotary axes on rotary and swivelling tables.

Tc 63-RG Globally unique roughness
measuring systems for automatic checks
in the original setting

Revolutionary roughness measuring systems for machining centres for precise evaluation of surface roughness of workpieces. Fast digital measurement of workpiece position and reliable detection of poor surface quality using analogue measurement.

Safe and reliable machining processes are a prerequisite for economically efficient production. GENIOR MODULAR monitors machines and processes and transforms collected data into usable information for the SMART FACTORY. In real-time, the system monitors the limits set automatically or manually so that you can identify potential problems before they become costly issues. Measurement data is acquired digitally via common fieldbus interfaces or via base modules with connected sensors. A core element of the system is its flexibility, which allows you to adapt and expand monitoring capabilities to meet your changing needs. Seamlessly integrate GENIOR MODULAR into your existing machine tools, speciality systems and production areas.

Transforming the future of machine tool manufacturing

From conceptualizing a new machine or part to achieving faster time-to-market, greater flexibility, improved quality, and higher efficiency, the machine tool industry demands cutting-edge solutions. By connecting the real and digital worlds, machine tool manufacturers and users can achieve this and more across the entire manufacturing lifecycle.

Join us at Hall 5, Booth B112 and find new ways to realize your digital transformation at every level of machine operation. Optimize your manufacturing processes to build a sustainable shopfloor with our scalable, modular & interoperable hardware & software solutions. Explore our latest digitalization portfolio based on Siemens Xcelerator, new SINUMERIK CNC innovations, machine services, flexible financing, and more.

Accelerate your sustainable, digital, future-proof transformation now!
